

The BIG Question!

What can we discover about faith?

This term we are taking exploration to a unique and new level. Not only are we looking at our beliefs, where they come from, how it guides our way of life and how we show our beliefs, we are also looking at faith in the community. Has it changed in the last 50 years? Have these changes enriched our borough? What are the faiths and beliefs in our class and school? We will also be exploring identify, diversity and belonging. What it's like being part of a community? With meaning, purpose and truth, how does what I believe help my understanding of life's journey? And of course, what is important to us and the faith we believe.
